Competitors are unregulated and therefore do not file tariffs with the PSC. It is unknown to Qwest what services are offered by the carriers and all locations that are served. There is no requirement for unregulated companies to disclose their service offerings and locations. This represents a "best effort" based on public advertising, interconnection agreements with Qwest about the competitive alternatives in our exchanges, and our employee's knowledge of local markets. Data sources include: Qwest Exchange tariff; publicly available advertising in telephone directories, websites, newspaper , direct mail; interconnection agreements with Qwest.

The facility-based providers and the providers using unbundled facilities offer basic local service and high speed broadband connections. VOIP services are offered by additional carriers when a customer has a broadband connection. Qwest does not have information if there are Montana customers subscribing to these services but they are available on a national basis: AT&T Call Advantage, Covad, Net@Phone, Packet 8, and Primus.
